Master Thesis: “Gender Differences in Economic Behavior”

We offer a Master thesis (or Bachelor thesis for students with prior knowledge on behavioral economics and suitable qualification) on the topic “Gender Differences in Economic Behavior” at the **Chair of Political Economy (ECON)**.

Do males and females differ systematically in specific domains of economic behavior? What have we learned from experimental economic research so far? The scope of this thesis is to create a literature review on gender differences in well-known and established economic experiments. Potential focus areas are moral and pro-social behavior, risk taking, competitiveness, ... Besides a literature overview, own follow-up experimental designs can be part of the thesis as well.

We expect from you...

- a high level of motivation and reliability
- sound basic knowledge in behavioral economics
- very good English skills
- independent and proactive way of working

Are you interested? Then please apply with a short motivation, CV and your transcript of records to leonie.fuetterer@kit.edu!
