

As support for our Chair, we are looking for a

## **RESEARCH ASSISTANT (Studentische Hilfskraft) for programming tasks**

The Chair of Political Economy, held by Prof. Nora Szech, is part of the ECON institute. Our main research topics are market design, behavioral economics and experimental economic research (see <http://polit.econ.kit.edu> for further information.)

### **Your tasks will mainly include:**

- **Coding/programming of experiments** (e.g. in oTree, a Python-based software for conducting experiments)
- **Providing assistance with the implementation** (running the experiment online/offline in the KD<sup>2</sup> Lab or on platforms such as MTurk, SoSci, etc.)
- **Managing/adjusting preexisting experiments** (fitting in minor changes in preexisting study designs)

### **Your profile:**

- Interest in coding and learning new coding skills
- Ideally, you have gained some prior experience in programming (Python is great but other languages are a good start as well)
- Interest in economic experiments/ topics in Behavioral Economics
- Reliability and team spirit
- Good English skills

We offer you the chance to actively engage in our research projects and experience diverse research methods and current projects at our Chair of Political Economy.

**Flexible starting date:** February 2022 onwards

**Working Time:** 30-40 hours a month (can be extended up to 60h/month)

Please apply with your CV and a transcript of records (Abitur and grades from your university studies) to Sibille Hackel ([polit@econ.kit.edu](mailto:polit@econ.kit.edu)). We are looking forward to receiving your application.
