

DESIGNING A TED-STYLE TALK ON ECONOMIC DESIGN AND VALUES

“Speech has allowed the communication of ideas, enabling human beings to work together to build the impossible.”

(Stephen Hawking)

“The only thing that truly matters in public speaking is not confidence, stage presence, or smooth talking. It’s having something worth to say.”

(Chris Anderson, Head of TED)

I. TOPIC DESCRIPTION

Societies depend on institutional regulations that shape their ways of social life. Elements of economic design and market design play an important role in the organization of societies and their economies.

Do the established structures (like markets – free or regulated –, voting systems or labor organization) meet our social requirements and moral standards? How could we reshape and design the institutions in our society to reach social justice and improve welfare?

TED talks have a duration of max. 18 minutes. Their purpose is to share “ideas worth spreading” with a broad audience. After more than 30 years of TED conferences and with over 3 billion views of online TED talks, this format shows that powerful public speaking needs less than 20 minutes.

What is your idea you like to share?

II. SCOPE OF THE SEMINAR

During the seminar, students develop their own “idea worth spreading” which will be presented in a TED-style talk. Students are expected to work in teams of three. Students can apply as teams. We will try to respect students’ wishes when assigning teams. (There is no guarantee we can respect your wishes, but we will do our best. Students can of course also apply individually.) We provide a list of possible topics for the seminar. Each topic may be assigned no more than twice. Students may also suggest their own ideas and topics of interest and use the suggested topics as a source of inspiration. Assignment of topics and binding teams will take place in the first two weeks of the seminar.

We expect from you a strong interest for the field of economic design and (moral) values. Students are expected to work self-contained, open-minded and critically on

their topic. We encourage every team to work on their talk following their own initiative, ideas and passion.

The introductory meeting will take place on 17 October 2018. Students will work in groups of three (if necessary, one team of two will be allowed). You can find a team partner on your own during the first two weeks of the seminar or you will be assigned a team partner. On January 18th 2019, there will be a day of presentations where you share your “idea worth spreading” in a max. 18 minutes talk in TED-style. Full attendance is required on that day for successful participation in the seminar!

Seminar papers of 3-5 pages (plus references) have to be handed in by February 25th 2019. Master students have to include two summaries of different length: one with 70-100 words, one with 150-200 words. Presentations of max. 18 minutes are followed by a discussion of the talk/video of about 20 minutes. Your contribution to the discussions will be included in your grading. Grading for Bachelor students consists of the seminar paper (30%), your talk (70%). For master students, grading consists of the seminar paper (20%), your talk (60%) and summaries (20%). Both Bachelor and Master students can improve their grades by 0.3 for good and constructive discussion contributions or by 0.7 for excellent and constructive discussion contributions.

Application will be possible via the centralized platform until 17 September 2018. For further questions, please contact David Huber (david.huber@kit.edu) or Jannis Engel (jannis.engel@kit.edu).

III. TOPICS (SUGGESTIONS & SOURCES OF INSPIRATION)

1. Collusion/Fraud in the Automotive Industry or other industries
2. Voting (e.g. Trump/Brexit/Voting Systems...)
3. Doping in sports
4. How much protection do consumers need?
5. Advertising: Curse or Blessing?
6. Achievement-oriented societies and values
7. Presentation of the thoughts of an important thinker in the domain of institutions and moral values (such as C. Gilligan, K. Marx, A. Roth, M. Sandel, A. Smith, ...)
8. Weapon Trade
9. Privacy vs. Security
10. Thoughts on: Google/Apple/Facebook...
11. Trading/Selling of Organs
12. Towards sustainable fashion?/food?/electronics?
